

BURR KING

BURR KING 'E' MACHINES ENHANCED GRINDERS AND POLISHERS

7211007 shown

*All the Features of our
Regular Belt Grinder Plus -*

- Variable Speed
- Running Indicator Light
- 30mm Mushroom Stop Button
- Positive Door Guard Switch
- Rapid-Stop Braking Technology
- GFCI Compatible VFD
- Special Drive Firmware

The 760E with Rapid-Stop Braking™ will activate the brake and stop the machine in just seconds when either the red mushroom stop is activated or the door is opened. With the addition of the switch, wired directly to the controller, it prevents operators from leaving the door in an open position while running. The door must be closed to activate the belt grinder.

We understand with a machine that runs as quiet and smooth as a Burr King grinder, sometimes in a shop environment it is nearly impossible to tell if the machine is running or not. The visual run indicator light, located on top of the controller, reduces the chance of an operator leaving the machine running when finished with the operation, or when they leave the working area. The run indicator light can be seen while the whisper of the machine can not be heard.

Most of our other machines we manufacture can also be outfitted with these enhanced features. Please contact your manufacturing representative or Burr King for more information.

DISC GRINDERS & POLISHING LATHES CAN ALSO BE ENHANCED

NOTICE: It should not be implied that the 760E is a safer machine to operate or to own than the standard belt grinders.

The "Enhanced" incorporates features that Burr King customers have suggested us adding. It must be understood improper uses of any equipment may be dangerous. Please read and understand all operating instructions.

ALWAYS WEAR PROTECTIVE EYE, FACE, ARM, LEG AND BODY GEAR WHEN USING ANY GRINDER, POLISHER, BUFFER OR OTHER ROTATING MACHINERY.
