BBA20 BELT GRINDER

IT'S WHAT YOU HAVE BEEN DREAMING ABOUT

**20" CONTACT
WHEEL**

**UPTO 6,000
SFPM**

**MULTIPLE MOTOR
CONFIGURATIONS
AVAILABLE**

Reece Bose during the Blade Show in Atlanta shows how he does it back at the shop on their 20" BBA.

Introduced to the Knifemaking World during the 2011 Blade Show in Atlanta, Ga Burr King's BBA20 Belt Grinder was designed with the single intention of giving you the largest contact wheel grinder on the market. The 20" contact wheel allows you to grind with the appearance and function of a flat grind with the ease of a hollow grind. The BBA20's contact wheel is machined from billet aluminum at Burr King's factory in Missouri. The wheel is covered with a 55-60 durometer neoprene for years of trouble free performance. Utilizing an extremely ridged aluminum cast frame this grinder follows in the foot steps of Burr King's legendary 960-272 Knifemaker's Grinder.
