Magnets for retrieving small ferrous metal parts from media

FILTRATION SYSTEMS

The stainless steel FilterPAK 8000 is designed to complement the Model 85. With 2x the filtration and twin pumps this will keep you running clean. The FilterPAK 4001 works well with the 25 & 45 chambers. The budget friendly SumpPak 1000 can be used with our systems or yours.

Optional magnetic starter with integrated timer. Available in single or three phase voltages. Variable speed options also available.
